React • Next.js • TypeScript • JavaScript (ES6+) • HTML5 • CSS3

Backend & APIs

Node.js • Express.js • ASP.NET Core (C#) • REST APIs • GraphQL (basics)
• API integration

Styling & UI

Tailwind CSS • Responsive Web Design • Component-based architecture

Data Visualization

Chart.js • Recharts • D3.js (basics) • dashboard development

Committed to delivering intuitive, high-performance solutions that support strategic decision-making and business growth.

Databases & ORM

PostgreSQL • MySQL • MongoDB • Firebase • Entity Framework Core

Tools & DevOps

Git • GitHub • Docker (basics) • Vercel • Netlify • CI/CD (GitHub Actions)

Soft Skills & Practices

Remote work • time management • problem-solving • communication • documentation • data confidentiality

Professional Experience

Freelance Full-Stack Developer – Self-Employed

May 2026 – Present

Remote

- Developed production-ready web applications and e-commerce solutions using React.js, Next.js, TypeScript, and Tailwind CSS, from analysis to deployment.
- Built and integrated REST APIs and backend services to connect frontend applications with business data and third-party services.
- Implemented e-commerce features including product management, categories, shopping workflows, order management, and administrative dashboards.
- Worked directly with clients to understand needs, propose technical solutions, and deliver features iteratively, ensuring high performance and SEO optimization.

Full-Stack Developer – Bisha Charm (ERP Platform)

Oct 2024 – Apr 2026

Casablanca

- Designed and developed a multi-activity ERP platform centralizing operations across six business divisions using React.js, Tailwind CSS, and ASP.NET Core 8 Web API.
- Built backend services with C#, Entity Framework Core, and PostgreSQL, implementing secure JWT-based authentication and Role-Based Access Control (RBAC).
- Developed dashboards and operational workflows for inventory, manufacturing, appointments, import/export, construction projects, and training management.
- Improved data traceability and reduced manual entry through multi-warehouse inventory workflows and automated stock movements.

Frontend Developer Intern – Agence Digitale FCPO

Mar 2024 – Sep 2024

Oujda / Remote

- Built an e-commerce management dashboard with React.js and TypeScript, featuring reusable components for product, category, and order management.
- Created interactive sales dashboards and data visualizations using Recharts to display KPIs and performance metrics.
- Implemented multilingual support with i18next and ensured responsive design across all devices.

Full-Stack Developer Intern – Conseil Régional de l’Oriental

Jun 2022 – Sep 2022

Oujda

- Developed a government web application to digitize the management of administrative files for associations and cooperatives using React.js and Node.js.
- Designed REST APIs and MySQL database structures, and implemented role-based access control and document management workflows.
- Created an administration dashboard to monitor files, users, and processing status, improving operational efficiency.

Education

SUPMTI Oujda – Engineering Degree (Bac+5), Computer Science

2019 – 2024
